Greenwich Village has a long and diverse history that has made it an important epicenter of LGBT life in New York City. In the pre-Stonewall years, amidst an atmosphere of fear and

repression, gay bars and other social gathering spaces were crucial in creating a sense of community and brewing political agitation. This curated theme highlights a few sites near Stonewall, all of which are included in a walkingtour brochure that we produced in collaboration with the National Parks Conservation Association.

A museum dedicated to LGBTQ+ culture and history is coming to NYC

The history of the Gay Rights Movement is woven into the fabric of New York City, from the Stonewall protests during the summer of 1969 to the HIV/AIDS activism of groups such as ACT UP throughout the eighties and nineties. Fittingly, The American LGBTQ+ Museum, first proposed in 2017, will finally find a home through a planned expansion of the New-York Historical Society Museum and Library. Once open, the new institution will host artifacts, posters, images, and other memorabilia showcasing one of the largest and hardest fought civil rights movements in American history.

Construction on the large-scale expansion of New-York Historical Society's building located in Central Park West, which the organization first moved into all the way back in 1907, is set to kick off next year. Meanwhile, the official opening of the American LGBTQ+ Museum is tentatively scheduled for 2024.
